Aging and Dual Diagnosis

Dr. Bruce McCreary

September 27, 2007, 2 – 4 pm

Meeting Challenges Using U-First Team Approach

Debora Steele & Pam Hamilton

October 25, 2007, 2 – 4 pm

Understanding & Managing Changing Behaviours

Associated with Aging Processes

Dr. Lindy Kilik & Dr. Katherine Buell

November 1, 2007, 2 – 4 pm

AGING, DEVELOPMENTAL DISABILITIES AND MENTAL HEALTH

BACKGROUND

A 2006 a two day conference sponsored by the Southeastern Ontario Aging and Developmental Disabilities committee was held in Kingston, Ontario to assemble experts in the field of aging, developmental disabilities and mental health.

Day One of the conference provided educational sessions for attendees about the needs of individuals who are aging. The focus of Day Two was to create a common vision and mission regarding aging, developmentally disabled individuals who have or are developing mental health problems. The group was asked the question, *“To move forward collaboratively on this issue, what needs to be done?”* One of the actions identified by attendees was to provide educational sessions to those working in the field who could not attend the conference. This videoconference series repeat sessions from the conference. We hope to facilitate a dialogue across sectors and among care providers to provide a forum for the exchange of knowledge and sharing of ideas. Also, by broadening our understanding of the services provided by each of the sectors and by listening to experts in this field, a best practices framework can be developed to overcome some of the barriers that are faced by care providers. A question and answer session will follow each presentation.

VIDEOCONFERENCES

September 27, 2007

Aging and Dual Diagnosis
Dr. Bruce McCreary, FRCP(C)

This session will identify the nature of the health problems experienced by persons with developmental disabilities as they grow older, describe the main features of various mental disorders in older persons with developmental disabilities and explain how aging has been conceptualized as a biomedical phenomenon.

October 25, 2007

***Meeting the Challenges Using a U-First
Team Approach***

Pam Hamilton, B.A.(Hons) Psych.
&
Debora Steele, R.N.

This session will explore a team solution finding approach that uses an innovative practical tool (U-First!) to promote a better understanding of the person's behaviour, possible causes and supportive care strategies.

November 1, 2007

***Understanding and Managing Changing
Behaviours Associated with Aging Processes***

Lindy Kilik, Ph.D., C.Psych
&
Katherine Buell, Ph.D.

This session addresses the behavioral changes associated with aging processes for persons with developmental disabilities and mental health issues. Behavioral supports and management techniques will be discussed.
